Dr. Mitsunori Oghihara, Professor of Computer Science
University of Miami, Coral Gables, FL

Jump-starting Digital Humanities

At the University of Miami in the College of Arts and Sciences and in the Otto G. Richter Library, an effort to promote digital humanities is underway. Computer scientist Mitsunori Oghihara is Associate Dean for Digital Library Innovation, a new associate dean position created for the purpose. For the past two years Oghihara has been collaborating with humanities and library faculty members to develop new research programs in digital humanities. His efforts so far include: software development for the Cuban Theater Digital Archive, text mining of Thomas Carlyle letters, text mining of Horace and Vergil, and OCR correction for handwritten Latin texts. In this presentation he will introduce these research projects and discuss his future plan.
